

# **Guardware** - tools to ensure responsible computer usage

## **FACT: ALL DIRECTORS, IT & HR MANAGERS ARE AT LEGAL RISK**

### **Plug & Play USB File Audit Control Tool**

### **You are risk from Pornography and other illegal downloads**

**FACT;** All organisations must embrace Information Technology as an essential component of their working environment but, legal and regulatory compliance are serious matters; as an increasing number of organisations, companies and their key staff and officers have found to their cost.

**FACT;** Should an organisation or company be found to be holding offensive or pornographic images, media or software that breaches copyright on their system (knowingly or not) the **ultimate responsibility is with the responsible Managers and Directors** and could result not only in a hefty fine and bad publicity for the organisation but even imprisonment of these key individuals.

**FACT;** Unauthorized staff downloads of music, offensive image files, video and movies are a major cause of non-compliance and a danger to the integrity of any network. No organisation or company is safe from the threat; private business, education, local and central government authorities and their key management can all **face prosecution** as the result of illegally downloaded or stored files.

**FACT;** the consequences of the downloading and storage of pornography, music and video clips on your computers are real business and legal compliance issues that result in;

☞ **Reduced productivity**

☞ **Resource misuse costs**

☞ **Exposure to legal liabilities; visit the web link below and read a paper on the legal exposures caused by inappropriate digital image by Dr Brian Bandey, a leading legal authority on the legal exposures that are created by the computer "Hazardsphere™" at**

Registered in England under Company No 4127246  
Registered for vat under Ref No 809 1077 36

**Guardware FACT** is a unique self contained USB solution to the auditing of Windows 2000®, XP® & Vista® based PCs & Laptops for inappropriate usage and unauthorized file storage

**Guardware FACT** does not require the user to load any software onto the machine under audit, it is "Plug & Play" and totally self contained with audit results written back to the unit in a universal report format from which they can be reviewed at a later date or exported to other systems.

The computer system under audit is not modified in any way, it continues to function exactly "as was" and no software is installed on it.

#### **Guardware FACT;**

Locates, identifies and reports,

- ☞ Pornographic and inappropriate image Files
- ☞ Video files
- ☞ HTML & Web files containing inappropriate or pornographic image
- ☞ Music files

audits can be conducted for all of the above or for selected headings.

#### **Guardware FACT;**

Delivers to business organisations of all sizes the facilities and benefits that are normally only associated with network deployed audit tools - at a price that any business can afford and without the need for multiple installations or per screen licence payments.

Has been received with acclaim by educational, business and enforcement authorities' world wide who seek a quick, simple and cost effective solution to their need to audit the content of PCs and Laptops.
